DVR-535

120 degree wide angle vehicle recorder

Genius is releasing a new vehicle recorder DVR-535 with an instant record feature and a 120 degree wide angle view. Simply mount the vehicle recorder onto the windshield, connect the car charger with the cigarette lighter, and it automatically record videos after the car engine is started. With the 2.4" panel, the recorded videos or photos can be played back and provided as proof or reference.

DVR-535 has a 120 degree wide view angle so it gives you a more complete video. While driving during the night, the IR light will compensate for the darkness so it will still record any unfortunate accidents. It provides video resolution up to 1280x720 pixels at 30 frames per second.

DVR-535 is the perfect digital vehicle recorder for anyone who spends a lot of time on the road and would like to record/document driving conditions around them.
